

7th International Meeting on Imagery Rescripting Call for submission

We are happy to announce that the International Imagery Rescripting Consortium is organizing the [7th Imagery Rescripting meeting on 15.-16. April 2027 in Tallinn](#) (Estonia) at the Tallinn University campus. Participation is free of charge and open to all researchers and clinicians interested in Imagery Rescripting. Please share this call with your relevant professional networks!

We welcome a wide range of different contributions on Imagery Rescripting for the program, so do not hesitate to submit regardless of whether you are a researcher or clinician, beginner or advanced, etc.

**** Please send in your submission to imrs2027@tlu.ee before 1. December 2026! ****

Research presentations (15 min incl questions). We welcome submissions with a focus on Imagery Rescripting, including experimental studies, clinical trials, case series, N = 1 studies, and other designs. Please submit a brief abstract including Presenter details, Title, Background, Methods, Results and Discussion. Clearly indicate “brief (15 min.) research presentation”

Clinical presentations (15 min incl questions) by clinicians may include successful or unsuccessful ImRs cases, new ideas on best practices, clinical challenges and solutions, etc. Please submit a brief abstract including Presenter details, Title, and the aim and take-home message. Clearly indicate “brief (15 min.) clinical presentation”.

Combined research and clinical presentations (30 min incl. questions). We encourage researchers and clinicians to co-present on a clinical ImRs study or ImRs topic. For example, the researcher may present the design and statistical results of the study, while the clinician who treated patients in the study shares their experiences. Other formats may be suitable, as long as it is a co-representation integrating scientific and clinical views on a specific ImRs topic. Please submit a brief abstract including Presenter details, Title, aim and outline of the presentation. Clearly indicate “combined (30 min.) presentation”.

Posters

Please submit a brief abstract including Presenter details, Title, Background, Methods, Results and Discussion. Clearly indicate “poster”.

Masterclasses (90 min). Offer an in-depth exploration of a specialized ImRs topic, focusing on the integration of theory, research, and therapeutic application. Masterclasses should provide an opportunity for skill development, case-based discussion, and critical reflection on challenges. It may also focus on integrating research routines in daily clinical ImRs practice (e.g., N=1 or routine outcome monitoring). Please submit a brief abstract including Presenter details, Title, learning goals and an outline /of the program. Clearly indicate “masterclass”.

If you have any questions, please contact us at imrs2027@tlu.ee

We look forward to your contributions and hope to see you in Tallinn!
